## Top Skills

Full-Stack Development  
Software Development  
JSON Web Token (JWT)

## Languages

Bengali (Native or Bilingual)  
English (Professional Working)

## Certifications

Software Processes and Agile Practices  
Electronic Arts - Software Engineering Job Simulation  
Foundations of Project Management  
Foundations of User Experience (UX) Design  
Introduction to Front End Development

## Honors-Awards

Dean's List Award  
Drew Honors Society

# Syed Afnan Adit

| Baldwin Honors CS Student @ Drew University | Data Science Graduate Certified | Software Engineering | AI/ML Engineer | Code Path | Python, Node.js, SQL  
Madison, New Jersey, United States

## Summary

Hello! I'm Adit, a Computer Science student in the Baldwin Honor Program at Drew University and I am also doing a Graduate Certification in Data Analytics . My interests lie at the in between AI/ML, and full-stack development. Through CodePath's AI Engineering, Advanced Web Development, and Technical Interview Preparation programs, I have strengthened my skills in building scalable applications and solving complex technical problems. I have industry experience as a Software Engineer Intern at Monstarlab Bangladesh, where I developed reusable React components and improved frontend performance, as well as open-source experience contributing bug fixes and feature improvements to AFFiNE. Beyond software development, I serve as a Subject Tutor, Embedded Learning Fellow, and Statistics Drop-In Host at Drew University's Center for Academic Excellence, supporting students in computer science, mathematics, and statistics. I also worked on an NLP research project for the Indiana University ISCA Datathon, where I developed a RoBERTa-based model in PyTorch to detect antisemitic content. I am passionate about building reliable software, applying AI to real-world challenges, contributing to open-source projects, and continuously expanding my knowledge through research and collaborative development.

---

## Experience

### Drew University

1 year 5 months

### Undergraduate Research for Computer Science

May 2026 - Present (2 months)

Madison, NJ

### Drop-in Host

October 2025 - Present (9 months)

Madison, NJ

### Embedded Learning Fellow

August 2025 - Present (11 months)

Madison, New Jersey, United States

Facilitated learning and academic support for a 13-student CSCI 151 (Object-Oriented Programming in Java) class by assisting with coding exercises, addressing individual queries, and conducting additional help sessions to enhance student understanding and performance.

Collaborated with the course professor to organize quiz reviews, manage supplemental instructional tasks, and improve overall class efficiency through proactive student engagement and tailored academic support

### Subject Tutor

February 2025 - Present (1 year 5 months)

Madison, New Jersey, United States

-Provided academic support for Computer Science and Math courses, through drop-in and scheduled tutoring sessions.

-Helped students improve their understanding of complex concepts by breaking down problems, guiding them through problem-solving techniques, and fostering independent learning.

### AFFiNE

#### Open Source Developer

December 2025 - February 2026 (3 months)

- Improved image rendering in AFFiNE by adding image-rendering: pixelated and nearest-neighbor scaling to keep pixel art and low-res icons sharp when scaled.

- Fixed data handling bugs by correcting Table View sorting for null/undefined values and stabilizing Notion HTML imports by ignoring invalid AST children, preventing crashes and disordered imports.

### Drew University Tilghman International Center

#### International Ambassador

August 2025 - August 2025 (1 month)

Madison, New Jersey, United States

### Indiana University Bloomington

#### Team Member | IU ISCA Datathon

July 2025 - August 2025 (2 months)

- Competed in a Datathon hosted by Indiana University's Institute for the Study of Contemporary Antisemitism (ISCA), developing a machine learning solution for detecting online antisemitic content.
- Scraped and filtered 300+ social media posts from X (Twitter) using BrightData's API, followed by manual annotation for dataset based on the IHRA Working Definition of Antisemitism, and quantified inter-annotator reliability using Krippendorff's Alpha ( $\alpha = .157$ ) to statistically validate dataset subjectivity and identify areas for guideline improvement.
- Fine-tuned a twitter-roberta-base-offensive transformer model using PyTorch on annotated datasets for detecting antisemitic hate speech and conspiracy theories.
- Evaluated model performance (71% accuracy) and conducted error analysis to reveal weaknesses in detecting nuanced hate speech; validated generalizability on an unseen dataset, achieving 97% recall for non-offensive content while identifying challenges with rare offensive cases.

## Monstarlab Bangladesh

### Software Engineer Intern

June 2025 - August 2025 (3 months)

Dhaka, Bangladesh

- Collaborated with a team of 6 developers to build reusable React components and modernize web pages, reducing UI inconsistencies, improving responsiveness, and cutting page load times by 25%, while implementing UX best practices to reduce user friction by 30%.
- Maintained codebase integrity using Git version control while communicating project updates and progress to senior developers, ensuring UI enhancements aligned with product goals and were delivered on schedule.

## Freelance

### High School Math Tutor

July 2023 - December 2023 (6 months)

Dhaka, Bangladesh

- Instructed students in five mathematics subjects, including: Algebra, Geometry, Trigonometry, Pre-Calculus, and Statistics
- Delivered targeted IGCSE (The International General Certificate of Secondary Education) exam preparation tutoring, to aid students in mastering mathematical concepts and problem-solving strategies
- Succeeded in improving student grades by a minimum of 15% from the prep exam to the final exam

## Education

Drew University

Bachelor's degree, Computer Science · (January 2024 - May 2027)

CodePath

Computer Science · (January 2025 - May 2025)
